TECH LOADOUT

Unreal Engine 4/5
C++ / C#
Python / Java / C
Blueprint
Git / Perforce / SVN
Scripting & automation

CORE SYSTEMS

Gameplay mechanics
Movement / flight systems
Inventory & interaction
UI-code communication
Input & navigation
Debugging / stabilization

LANGUAGES

Portuguese - Fluent
English - Advanced
Japanese - Basic
Spanish - Basic

RECRUITER SIGNAL

Open to remote game/software roles focused on gameplay systems, UI engineering, tools, debugging and production support.

Game Developer

Technical Game Programmer - Gameplay, UI & Systems

Unreal **C++** **Gameplay** **UI Systems** **Debugging** **Remote-ready**

Game programmer with 4+ years of production experience implementing, integrating, debugging and stabilizing gameplay, UI/application logic, inventory, interaction, movement and player-facing systems. Comfortable working inside existing Unreal Engine 4/5 and production architectures, collaborating with design, art, QA, backend and production teams, and turning gameplay intent into reliable code.

GAME DEV FOCUS

Gameplay & Systems

Mechanics, skills, movement, interaction flows, state-driven features and player-facing systems.

UI & Player Experience

Menus, navigation, reusable UI components and UI-to-code communication for reliable player flows.

Production Debugging

Stabilization, testing, bottleneck investigation, documentation and maintainable fixes in live codebases.

Team Integration

Practical collaboration with engineering, design, art, QA, backend and production across milestones.

PRODUCTION EXPERIENCE

Big Moxi Games - Full Stack Programmer

Sep 2021 - Nov 2025

- Developed gameplay, UI and application systems using C++, C#, Python, Blueprint and version-control workflows.
- Implemented independent features and modules inside existing production architectures while preserving stability and readability.
- Built and stabilized gameplay mechanics, character skills, movement/flight behavior, inventory systems and interaction logic.
- Connected UI and gameplay/application logic through reusable flows, menu states and state-driven behavior.
- Debugged, tested and stabilized gameplay logic, UI behavior and client-facing features across production projects.

Tri-Crystal Studios - UI Programmer

Aug 2021 - May 2023

- Implemented player-facing menus, screens, reusable UI components, responsive layouts and production-ready user flows.
- Developed keyboard/gamepad navigation, menu states and interaction behavior for reliable player input.

FEATURED PROJECTS

Wardens Rising

Gameplay mechanics, character skills and Unreal gameplay systems.

ExoGP

Flight and movement implementation focused on responsive gameplay behavior.

Reaper Actual

UI-code communication, inventory systems and application/gameplay integration.

EDUCATION

B.Sc. in Computer Science, Anhanguera Expected July 2029
